Notes : Data for liquid assets and liquidity ratios are as at the last day of the month while data for liabilities base are the average of the daily eligible liabilities for a two-week liabilities base period beginning on a Thursday and ending on a Wednesday.

As MAS Notice 613 was phased out over 2015, the data for banks which are already complying with MAS Notice 649 is not listed on this page. In view of changes to the local liquidity regulations, Table I.8 is discontinued with effect from 1 January 2016. Historical data will still be available on the MAS website. Please contact us at [webmaster@mas.gov.sg](mailto:webmaster@mas.gov.sg) if you have any queries.

Columns 1, 2 & 4 Refer to end of period.

Column 6 Charge-off rate for the year is defined as the bad debts written off during the year divided by the average rollover balance for the same year. As monthly charge-off rates tend to be too volatile, we have chosen to publish quarterly charge-off rates instead. However, there can still be seasonal variations. The quarterly charge-off rate is calculated by annualising the ratio obtained from dividing the bad debts written off for the quarter by the average rollover balance for the same quarter.
